```java
public class Thing
{
    private String color;

    public Thing()
    {
        this("");
    }

    public Thing(String color)
    {
        setColor(color);
    }

    public void setColor(String color)
    {
        this.color = color;
    }

    public String getColor()
    {
        return color;
    }

    public String toString()
    {
        return "I am a "+getColor()+" thing";
    }

    public static void main(String[] args)
    {
        Thing x = new Thing("Red");
        System.out.println(x);
    }
}
```
